Who I Am

With over 21 years of hands-on experience across India's leading manufacturing and engineering companies, I have grown from Engineer to Group Manager — building deep, practical expertise in Vendor Development, Cost Saving, Strategic Sourcing, Procurement, Team Building, and Hiring.

I don't teach theory from a textbook. Every strategy I share has been tested on real production floors, in real vendor negotiations, and with real teams — under real business pressure.

Career Timeline

Year	Company	Role
1999	Elin India	Engineer
2001	FCC India	Engineer
2003	Uno Minda	Engineer
2014	Allied Nippon	Manager
2018	Uniparts Group	Sr. Manager
2020	Ratek Pheon	Group Manager

The Problem

Most companies lose money not because of big mistakes, but because of small, repeated inefficiencies:

- Vendor contracts that were never renegotiated
- Hiring decisions made under time pressure, not strategy
- Teams that work hard but don't work together
- Cost-saving ideas that exist on paper but never get implemented
- Employees running low on energy and focus, unnoticed and unmeasured

These gaps quietly cost lakhs — sometimes crores — every year.

Programs Offered

Module 1: Cost Saving & Vendor Development

Practical frameworks to identify hidden cost leaks, renegotiate vendor terms, and build a vendor development system that keeps saving money year after year — not just a one-time fix.

Module 2: Team Building

Sessions designed to turn a group of individuals into a high-performing team — covering communication, accountability, and the day-to-day habits that build trust on the floor and in the office.

Module 3: Hiring & Talent Strategy

A practical approach to hiring right the first time — reducing turnover, avoiding costly mis-hires, and building a team that fits your company's real needs, not just the job description.

Module 4: Employee Wellness & Fitness

A tired, unfit team is a hidden cost most companies never measure. Having personally lost 30kg without a gym — while working the same long, high-pressure corporate hours your employees work — I train employees on simple, no-equipment routines they can do before office, during breaks, or right after leaving work. A fitter team means better focus, better energy, and better output.

Format Options

- Half-day workshop (on-site)
- Full-day seminar for leadership teams
- Ongoing monthly consulting engagement
- 1-on-1 sessions with directors / owners

Available at national and international level, in-person or virtual.

Why Work With Me

I bring a rare combination: 21+ years of real MNC execution experience across Vendor Development, Cost Saving, and Team Building — plus the proven discipline of someone who transformed his own life, losing 30kg without a gym through consistency and smart systems. If I can apply that discipline to my own body, I can help apply it to your business and your people.
